

QUESTIONS TO ASK A POST HOSPITAL CARE FACILITY

When your senior loved one needs post hospital care, choosing the right facility is crucial. Ask these four key questions to ensure your senior receives the best possible care.

1. What services will my loved one need, and for how long?

Speak with your hospital's **discharge planner** to understand the treatment your loved one needs, then contact admissions coordinators at post hospital care facilities.

2. How is this facility handling COVID-19?

Thoroughly vet the facility's **COVID-19 safety protocols** and case reports. With pre-admission tours and visitation opportunities restricted, ask how the facility will support your family. In Oregon, visit **Oregon.gov**. In Nevada, visit the state's **Health Response** resource page. California residents can find details on the state's **Care in Senior Living** website.

3. Does the staff excel at senior clinical care?

First, review the facility's **CMS rating**. Then, ask if rehab and clinical services are readily available onsite.

4. What should I do to prepare my loved one for their stay?

Find out what they can **bring from home**. The best post hospital care facilities understand their patients' desire to have familiar items nearby.
